KIMTECH PURE* G3 and G5 STERLING* Nitrile Gloves

Better Performance

The STERLING* Glove Technology combines the protection of nitrile with the sensitivity of latex. Our manufacturing process boosts the glove's tensile strength (the force required to break through the glove) to increase its already superior barrier protection. The process also allows a reduction in glove thickness, so less force is required to stretch the material. The result is a latex-free glove with the dexterity and sensitivity of latex.

Better Value

These innovative gloves lower waste without sacrificing strength, comfort or protection. Improved performance means a better value for you and your business.
